

Performance Reporting

Every business, enterprise and project requires meaningful reporting to enable effective business analysis – critical for forecasting, tracking and reviewing budgets, progress and more. RPCuk has a wealth of experience in reporting datasets, and whether you are using Oracle Primavera software solutions, or other products, such as Microsoft Power BI, our accelerated design framework can help to shape your report development to deliver the information you need faster and in a more productive way.

Overview

Oracle Primavera P6 Analytics is a packaged Oracle Business Intelligence solution that provides unprecedented visibility into your Oracle Primavera P6 EPPM and Oracle Primavera Unifier projects and portfolios to allow you to handle large-scale projects with ease. Deployed within Oracle Business Intelligence Suite Enterprise Edition (OBIEE), it provides data warehousing that allows you to uncover trends, discover the root causes of issues, forecast costs and improve your organisation's strategic and project-level decision making.

By using Oracle Primavera P6 Analytics alongside your EPPM and Unifier projects and portfolios, you will reap the benefits of proven methods of enhanced resource analysis, variance analysis, earned value management, and cost and schedule performance and will be able to add your own reports, scorecards and KPIs to augment the pre-configured dashboards to reflect the reporting information you require. As a result, you will be able to generate powerful reports that will help you to understand at a glance the performance and trends across all your projects and portfolios.

OBIEE can be used without P6 Analytics and with or without the additional Oracle BI Publisher. Both OBIEE and BI Publisher will connect with data held within Oracle Primavera P6 or Oracle Primavera Unifier, but do not offer data warehousing of their own. BI Publisher is a quick and easy solution for producing report documents and interactive management reports, and can generate up to tens of thousands of reporting documents per hour, but requires SQL coding to create the reports you need and offers more limited functionality and report types. Let RPCuk guide you to choose the solution that is right for you and your business.

Features

Oracle Primavera P6 Analytics

- · Available as a Cloud Service or on-premise
- Compile a complete project history and identify trends over time
- Analyse facilities and real-estate management data
- Analyse cost sheet, cash flow and business
 process data
- Exception-based reporting helps you to identify problem areas with ease
- · Interactive dashboards, scorecards and reports
- Visualise project, activity and resource data by geographic location with geospatial maps
- Full drilldown capability of data analysis
- Modify default dashboards or build your own reports to meet your business needs
- Personalise dashboards according to organisational role
- Download reports to any format for ease of distribution and review
- Daily burn-downs for off-line maintenance projects
- Track routine or on-line maintenance projects using KPIs based on INPO AP-928 standards

Benefits

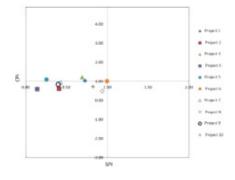

- Make better project portfolio decisions
- · Quickly identify potential performance issues
- Correct problems throughout the project lifecycle
- Gain a clear understanding of project and program schedule and cost performance
- Manage resources efficiently across your entire enterprise

Oracle Business Intelligence Suite Enterprise Edition

- Drillable tables
- Multiple chart types
- Supports the creation of KPIs and query-based watchlists
- Drag-and-drop
- Interactive dashboards
- Just-in-time alerts

Oracle BI Publisher

- Available as Cloud Service or on-premise
- Over 40 out-of-the-box reports for both P6 and Unifier
- Uncover deep insights into projects
- Create your own reports to analyse cost sheet, cash flow and business process
- Interactive dashboards and reports enable you to gather project insights
- Download reports to any format for ease of distribution and review
- Combine both P6 and Unifier data into a single report and/or dashboard

- One single, flexible solution for your entire organisation
- Maximise ROI within your business by maintaining close and clear visibility of costs, resources and progress
