Oracle Primavera Education Series

Course Title	Primavera Unifier uDesigner Fundamentals 15
Course Code	602
Version Relevance	Release 15
Course Duration	4 days
Course Delivery	Classroom or Online
Course Audience	Administrator, System Administrator
Prerequisite(s)	Primavera Unifier Administration 15
Courseware Author	RPCuk

Course Summary

This Primavera Unifier uDesigner Fundamentals training enables you to design business processes, attribute forms and shells. Our Oracle experts will help you develop the knowledge and skills to make effective design decisions that will transform designs into a functioning user interface.

Day 1: Engage in Hands-on Exercises

The course begins with an overview of navigation and introduces design and development concepts. You will gain hands-on experience creating data structures and record statuses, and designing a shell and a user attributes form.

Day 2: Design Business Processes

Next, you will dive into designing and building commonly used examples of Simple and Line Item business process types. You will also learn how to re-use forms.
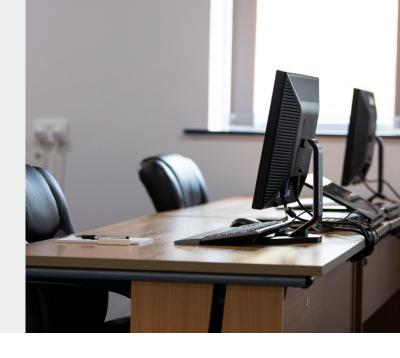

Day 3: Explore Workflows

You will learn about additional workflow functionality, such as conditional routing, building formulas and validation, auto-publishing to Document Manager, enabling workflow actions via email, auto-sequencing, auto-population, and line item consolidation.

Day 4: Integration and uDesigner Processes

You will learn about integration, advanced log design, and uDesigner versioning. Finally, you will learn how to deploy completed designs, import, create, and export design bundles.

Features

- Follow good design practices
- Distinguish process types
- Create data structures, shells, business processes and attribute shells
- Add functionality to forms, such as consolidation of line items, validation, auto-population, and linked elements
- Use production bundles

Course Objectives

- Utilize uDesigner
- Follow good design practices
- Learn business process types
- Create data structures

- Create shells
- Create business processes
- Attribute forms

Course Topics

Unifier Objects

- Creating Objects
- Creating Data Structures
- Defining Data

Workflow Functionality

- Conditional Routing
- Sub-Workflows

Form Functionality

- Formulas, Validation, Consolidation & Reset

Business Process

- Business Process Creation
- Re-using Forms
- Upper Form Templates
- Simple-Type Business Process
- Line Item Non-Workflow Business Process
- Text Type Business Process
- Document Type Business Process
