Oracle Primavera Education Series

|	
Course Title	Primavera P6 EPPM Earned Value Management Course
Course Code	RPEVM
Version Relevance	Release 8.x and above
Course Duration	1 day
Course Delivery	Classroom or Online
Course Audience	PMO team members, Primavera implementers and implementation team members, Primavera Administrators, Primavera P6 end users, IT Project Managers
Prerequisite(s)	Used Primavera P6 EPPM (desirable), Basic knowledge of mathematics, Computer literate
Courseware Author	RPCuk

Course Summary

Earned Value Management (EVM) increasingly plays a key part in an organisation's reporting of performance and reducing waste. This course explores the key fundamental principles of EVM and how to configure, deploy and report EVM using P6 Release 15.1. This course includes the theory and concepts of EVM and explains the algorithms used in EVM and demonstrates the correct configurations P6 EPPM Release 15.1 and the options available.

Understanding the standard data that is available is a key component of EVM reporting and this course explores how additional data can be made available when using the Primavera reporting database.

ℹ Why Should You Attend This Workshop?

- This course provides a solid background to EVM theory with proven techniques and also empowers application administrators to configure the Primavera P6 EPPM application correctly

- You should attend this workshop if you are using P6 Release 8 and intend to implement EVM performance metrics

- This course will also provide implementers with a solid understanding of what can and cannot be achieved in P6 EPPM with "out of the box" EVM configuration

Course Objectives

- Attendees will understand the EVM concepts and algorithms and how and what configuration decisions are required when implementing EVM in P6 EPPM

- Another key objective of this course is to understand the standard EPPM data available and also how to access the potential data available from the Reporting Database

- Users and administrators will be empowered with the knowledge required to implement EVM in Primavera

Course Topics

- The theory and concepts of EVM

- Understanding the algorithms used in EVM

- How to configure P6 EPPM and understating the decisions to be made

- Understanding the standard data available within a standard EPPM P6 environment and the additional data available when using the Primavera reporting database
